

## Light and Shadow Walk

Take a light and shadow walk around your neighborhood. Observe how the available light sources cre

| create  | shadows. Answer the following questions:   |
|---|--|
| 1.  | Where are the shadows?   |
|   |  |
| ว   | What shapes are the shadows?   |
| ۷.  | What shapes are the shadows?   |
|   |  |
| 3.  | Are there any shadows that overlap?  |
|   |  |
|   |  |
| 4.  | What causes the shadows?   |
|   |  |
| 5.  | Are they always the same?  |
|   |  |
|   |  |
| Then use a flashlight to create your own shadows. Answer the following questions about your |  |
| observations:   |  |
| 1   | How do the shadows change when you move the flashlight?                                    |
| 1.  | Tiow do the shadows change when you move the rashinght.                                    |
|   |  |
|   |  |
| 2.  | How are the shadows created with a flashlight similar to or different from shadows created |
|   | with other types of light sources?   |
|   |  |
|   |  |
|   |  |
| 3.  | On the back, draw some of the shadows that you have seen.                                  |
